Tues 4/3 Arrivals:	From Binghamton arr. 11:20 at AUS. To campus ~12:30 From Ithaca: Dani arr. 12:30pm; Larry arr. 12:20 From LA: Clare arr. 12:30pm; David arr. ~1:02pm Tentatively Kirk will arrange pickup ~1pm for all of us.
Tues 4/3 3pm	Status report - any Taiger admin. plus Taiwan activities. Group resources (web site - GIS - data/maps). - Field experiments info (logistics, deployment, data). - Next trips to field (BB-OBS deployment, Reftek airgun scouting) ~September - October trip for coordination active source, field scouting
Tue PM, Wed AM	Status reports from various PIs and students (Tues PM and Wed AM): - results of any data analysis. - publishable units. Francis: Taiger passive array. Francis: re-analysis of existing network data. Eleanor/Kao Kuochen: any results/work related to Taiger. Martyn: MT field work. To be reported by Okaya Nik: Petrophysics lab results. To be reported by Okaya David: crustal S-splitting in ERI data related to petrophysics. Francis: Longitudinal Valley and Offshore Hengchun (12/26/07) earthquakes and ties to Taicrust results and TAIGER. David: coordinate transformations TWD-67 and WGS-84. Larry/Dani: analysis of CPC industry data. Larry/Dani: receiver functions Luc: any preliminary modeling since last Austin meeting. Clare: geodynamical modeling work.
Dinner 7pm	
Wed 4/4 morning	Continue with Status reports from various PIs/students.
Wed 4/4 afternoon	Science questions we can address in Year 3. Year 3 Science Tasks (publishable units by Autumn '07). collaborations within our group. Science themes needing more funding: Decollement imaging - why, what, and funding: formalize this if we really want to do it.
Wed 4/4 evening	Field Planning Explosion schedule Outline staffing field season – onshore/offshore
Thurs 4/5 morning	Begin geodynamics discussion. Geodynamical concepts: Continental/Oceanic lithospheres, Available observations and geodynamic simulations. What can TAIGER experiments provide? Current status of geodynamics modeling: different methodologies. What we can do before the experimental results become available? Definitions and getting started. Led by Luc.
Thurs 4/5 afternoon	Geodynamics. (led by Luc). Training to run actual models?

Thurs 4/5 evening	OBS siting
Fri 4/6 morning	Geodynamics.
Fri 4/6 afternoon	Departure for most; Okaya and Wu remain to work with Luc and Kirk.
